DETAILED ACTION

Priority

The office acknowledges benefit of priority of provisional application 60/453,493

Specification

The disclosure is objected to because of the following informalities:

Paragraph 14 line 4, the exterior shell is improperly labeled item 10. All other references in the disclosure label the exterior shell as item 12.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 3 recites the limitation "the top opening" in line 3. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 8 recites the limitation "the file storage purpose" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lupynec (US Patent 5,211,457). Lupynec discloses a file storage device featuring:

- a. An exterior shell (22)
- b. An openable panel (32)
- c. A file support structure (2) with a file suspension device (38)
- d. Open top accessible when panel is open (col. 1 ln. 26-29)
- e. A pair of opposed side panels (24)
- f. A front panel (32)
- g. A pair of suspension surfaces (38)
- h. A top panel (28)

It is clear that the suspension surfaces provide an arched support and downwardly cascading display of files (see fig. 3). Also, with the front and top panel closed the cabinet forms a table, which hides the stored files.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- i. Adams (US 1,335,415) discloses a cabinet with structure and function similar to invention of Applicant.
 - j. Köhler (US 3,704,051) also discloses a similar filling cabinet structure.
